# DeFi Builder

The Wordpress of Web3

Offering **Web3 Builders** tools to cheaply, quickly, and securely launch **DeFi Applications** on **any blockchain** with **no coding required**.

Problems with Traditional Web3 Development

High Costs

Hiring a development team can be a burdening cost, stopping entrepreneurs from launching their idea, and many resort to freelance devs.

Low Security

Due to the grey nature of blockchain development, it's often hard to assess the code quality you're receiving from a freelancer.

Long Timeline

Freelance developer timelines may be quite lengthy, even for the development of simple DeFi applications.
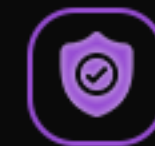

Skill Specific

Some protocols require skill specific developers that are difficult to find. Picking the wrong developer for your project could be compromising.

defibuilder.com

Our Solution

Lower Costs

Our services will be priced at least 90% less expensive than hiring a traditional Web3 Development studio.

High Security

Our modules will be audited internally by our team and by audit firms to ensure the security of our customers.

Fast Deployments

Through DeFi Builders users will be able to customize and deploy protocols that would otherwise take up to a month to deploy.

Vast Library

Our library and our module marketplace will ensure that new DeFi technologies and protocols are available for anyone to launch.

DeFi Builder **Features**

DeFi Builder AI

- AI Smart Contract Generation
- Contract Compilation
- AI Auditor & PDF Report Generation
- Contract Deployment

## Modular Builder

- ERC20, ERC404, ERC721
- Multiple DeFi Modules
- Frontend Customization
- Management Dashboard

Module Marketplace

- Third Party Developers
- Security Checks
- Module Variety
- Multiple Revenue Streams

DeFi Builder
defibuilder.com

Deployable DeFi Applications

- Decentralized Exchanges
- Yield Farming Protocols
- Token Launchpads
- Lending & Borrowing
- Stableswap

Traction Achievements

1000+ Founders Across Various Private Blockchain Groups owned by us

1500 &300K

Followers and Organic Impressions from Hack Victores, Blockchain Partnerships and Galaxe Campagins

$45K

Won Across 9 Hackathons in 5 Months (xDay, Nearcon, ETH Global, Fuel House, ICP Balkans, Starknet, Solana, Areon Network, ETH Bucharest)

7 LOIs

Signed with Blockchains & Projects (Linea, Hela Labs, LightLink, Arthera Areon, Blast Up, Starter.xyz)

500+ Contracts Generated and **400+** ERC404 Deployments

Roland Oanca
Frontend Dev

Eve
Graphic Designer

Jack
Marketing Manager

John Elbert Falsis
Socia Media Manager

3 DeFi Projects Launched

The team has launched 3 major DeFi Protocols in the past 3 years, ranging from Yield Farming, DEX, NFT and Sports Betting.

Over $4M Raised

The past projects have raised over $4M through direct participation on Launchpads.

More than $80M Managed

The team has managed over $80M in Total Value Locked across projects.

Currently in BFG Accelerator

Supported Chains

Deploy on 15+ EVM Blockchains

Ethereum · Polygon · Polygon zk · Arthera · Gnosis

LightLink · Core · Arbitrum · Linea Chain

ZkSync · Areon · BSC · Base

Degen Chain · Blast
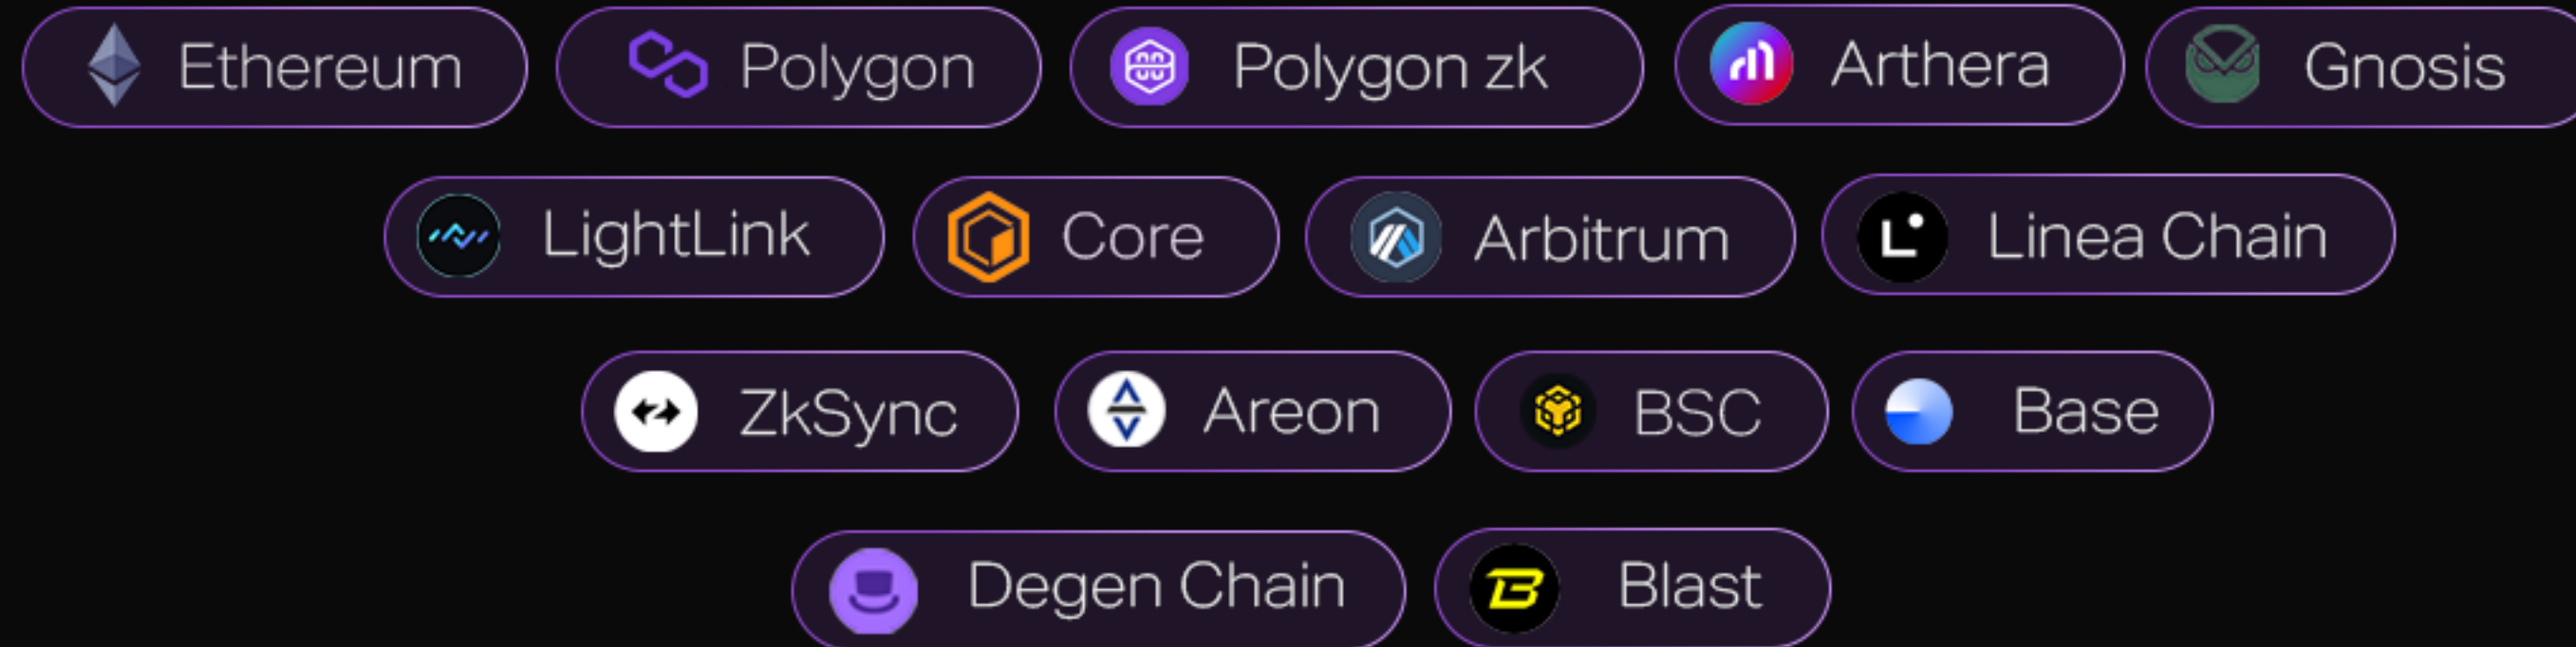

Support for Non EVM Chains Coming Soon on DeFi Builder AI

Algorand

Roadmap of DeFi Builder

Q1 2024
DeFi Builder AI Launch

→ Initial Release of the DeFi Builder AI

→ DeFi Builder AI Integration on 6 blockchains

→ Release of AI Auditor

→ ERC404 Token Builder Launch
(400 deployments, 5 Chains Supported)

→ 4 LOIs Secured with Blockchains
(Linea, LightLink, Hela Labs, Arthera)

Q2 2024
Modular Builder V1

→ DeFi Builder AI on 6 more chains,
ERC404 on 6 more chains

→ Early Access Packages Modular Builder

→ First 5 Modules for Modular Builder
(Tokens, Presales, DEX, Farms, Vesting)

→ 500 Generations on DeFi Builder AI

→ 3 more LOIs secured with Blockchains
(Areon, Blast Up, Starter.xyz)

Q3 2024
Module Marketplace

→ Launch Module Marketplace

→ Partnership with an Audit Firm for
Module Marketplace Audits

→ Potential Utility Token Launch

→ User Dashboard Finalization for all Modules

→ 5 Additional Modules for Modular Builder

DeFi Builder Merges **Artificial Intelligence, Modularity** and **Frontend Customization** to offer an **All in One Solution**

Current Revenue Streams

①

Deployment Fees

0.01 ETH ($30) / Token Deployment
$300 / DEX + Farms Deployment
$200 / Presale Deployment

②

Module Royalties

30% DEX Transaction Fees
20% Farm Deposit Fees
10% Presale Raise

Upcoming Revenue Streams

③

Platform Subscription

Standard: $20-50 / Month
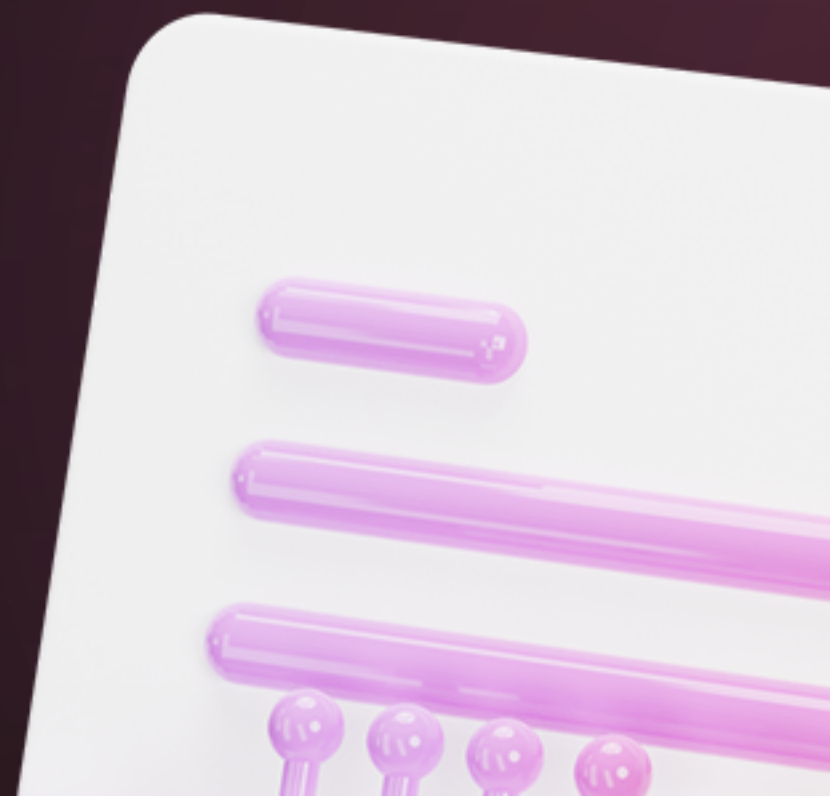

(based on module complexity)

Enterprise: Privately Discussed based on project traffic requirements

④

Module Marketplace Royalties

Royalties from the sales on our module marketplace.

20% Royalty on each sale performed by third party developers
